

Get Your Rabies Series at University Health Services!!!

What you need to know:

- The initial, and subsequent injections, must be by **APPOINTMENT** only!
- The earlier in the semester you see us, the better!
- Our clinic is open Monday through Friday, 8am to 5pm at 1202 W. Farm Rd.
- Our scheduling number is 405-744-7665 and our nurse's line is 405-744-7024.

**It is important that we get an idea of how many students need the vaccine at the beginning of the semester. We have to start a list and plan for each student to get a series of 3 injections, on days 0, 7, and 21 (or 28). Because of the expensive nature of the vaccine, and because of its high demand, there are often shortages across the state. It is imperative that you call us early to reserve your medication! In addition, if you cannot commit to the vaccination schedule, your vaccine will be given to the next student in line and you will have to begin the series again.*
