Students pursuing careers in the health sciences often make their career decision prior to undergraduate enrollment. The goal of our Early Admission Program is to aid students with strong academic ability that are interested in veterinary medicine and guide them in their pursuit of a veterinary medical career.

The Early Admission Program strives to provide guidance, direction, mentorship, and provisional admission for students with superior academic achievement and interpersonal skills that are well-suited to the missions of the veterinary profession.

**Early Admission Program Eligibility**

The Early Admission Program (EAP) is applicable to all incoming, true freshmen (graduated from high school in May of application year), undergraduate students enrolled at a 4-year comprehensive university in the state of Oklahoma, regardless of residency status. Applications for the Early Admission Program will be available on the school’s website after August 1st every year. Applicants are eligible for the program if they have a score of at least 28 on the ACT or 1300 on the SAT.

Applicants must also be able to demonstrate strong interest in veterinary medicine, effective leadership and communication skills, and other non-technical skills which reflect knowledge and aptitudes necessary for successful practice of veterinary medicine and/or the potential for developing these attributes. Experience working with or shadowing a veterinarian is preferred but not required.

**College Pre-Veterinary Requirements**

Students in the EAP are provisionally accepted to the College of Veterinary Medicine. To stay active in the program, all pre-veterinary required courses, as well as the undergraduate degree, must be completed successfully in 8 consecutive semesters (or less). Students must maintain a full-time status and a current GPA of at least 3.5 each semester of undergraduate study. Summer coursework taken while in college must be pre-approved by the CVHS Student Services Office. One veterinary related activity is required of each Early Admission student per semester. These activities will be logged and submitted before acceptance is complete. Last, students must complete a summer internship at a veterinary clinic of their choice and receive a positive evaluation letter from the supervising veterinarian before matriculation.
