Controlling Internal Parasites in Sheep and Goats

This year's rainfall will promote larval hatching and consequently consumption by small ruminants. Dr. Lionel Dawson offers animal owners important information on how to handle parasites in small ruminants. Read the full article at Controlling Internal Parasites in Sheep and Goats.

Small Animal Internal Medicine Locums Needed

We need small animal internal medicine locums for stints of one week or more. A VERY competitive stipend is available for anyone board certified in small animal internal medicine by the ACVIM or ECVIM. Read more at Small Animal Internal Medicine Locums.

July Employees of the Month

Congratulations to the 2021 July Employees of the Month:

- **Christine Nichols** is the continuing education coordinator located in the Academic Center. When called upon to plan the House Officer Farewell Reception, she went above and beyond to make it happen. With very little time to work with, Christine organized the reception, sent announcements, took RSVPs, ordered food and reserved a

Summer Seminar a Success

The OSU/OVMA Summer Seminar was a success with more than 220 participating virtually. Special thanks to seminar organizers and all those who presented! Read more at OSU/OVMA Summer Seminar.

House Officer Seminar

**Sheila Megehee, DVM**, will present "Retained Fetal Membranes" on Thursday, July 29, at 8 a.m. in Room 002C at the Veterinary Teaching Hospital. Dr. Megehee is a theriogenology resident mentored by Dr. Fabio Pinalli.
room. Even with short notice, the event was wonderful.

• **Crystal Stanley** is a senior lab technician with the serology team at the Oklahoma Animal Disease Diagnostic Laboratory. She is hard working and always steps up to take on anything asked of her. Recently Crystal has kept paperwork in order and dealt with an influx of unexpected testing. Her attention to detail is unmatched and she makes sure clients get the high quality results they expect.

• **Tanner Williams** is a maintenance mechanic II assigned to McElroy Hall. He is dedicated, motivated and willing to assist others. Tanner has taken on multiple new responsibilities this year and is exceeding expectations. He makes daily rounds of McElroy Hall and is always looking to improve himself as well as the systems he works on. McElroy Hall is a large building with numerous complex systems but Tanner always wears a smile and has an upbeat attitude.

**Getting to Know You**

**Jentry McGregor** is an emergency critical care veterinary technician. Originally from Belleville, Kansas, she earned an associate of applied sciences degree in Veterinary Nursing from Colby Community College in Colby, Kansas.

Jentry played saxophone in high school and college band. In her spare time, she enjoys spending time with her pitbull, Bandy, and taking road trips with Bandy and her fiancé.
