ExamSoft Information

The Oklahoma State University College of Veterinary Medicine uses ExamSoft for taking computer-based exams for the Professional DVM Program. ExamSoft is a computer-based testing application that enables test creation, secure test administration through Examplify, exam scoring, and robust assessment at the item, student, and program levels. The OSU-CVM provides support to both faculty and students in using ExamSoft, including training, technical proctoring for exams, installation, and troubleshooting. Examplify is the software students will use to take exams, take-home quizzes, and how they will be scored on objective structured clinical examinations (practicals).

Device Requirements for the Professional DVM Program

The Professional DVM Program will be using Examplify for administering computer-based exams beginning in August 2020. All incoming students for the Professional DVM Program must purchase one of the recommended device configurations or ensure their current device meets the minimum system requirements. Their device must use one of these operating systems to satisfy the minimum system requirement for teaching and examinations in the Professional DVM Program at OSU-CVM.

Existing DVM students should review Examplify’s minimum system requirements to ensure their current device is compatible with Examplify for test taking on their devices or laptops. Examplify can be used on virtually any modern computer (i.e. purchased within the last 3-4 years). At this time, ExamSoft only supports Mac, Windows, and iPad operating systems. Examplify will not run on Chrome, Android, or Linux operating systems.

Please select your preferred operating system for a complete list of requirements:

Examplify Minimum System Requirements:

- Windows
- Mac OS X
- Examplify for iPad
